LEADING THE WAY

FOR STUDENT ENGAGEMENT

Rationale:

"The current study replicates our previous research that the adolescent brain is more responsive and excitable to rewards compared to adults and to younger children,"

- Galván, a neuroscientist at the University of California, Los Angeles,
Journal Proceedings of the National Academy of Sciences

Adolescents show reward-related activity in the ventral striatum.

Ethics in Homeroom

A vertical stack of three banners. The top banner is light blue and contains icons for a boombox, a smartphone, a mobile phone, a handheld video game console, a car, and a remote control. The middle banner is dark blue with the text "HOW BATTERIES WORK" in white. The bottom banner is light blue and contains icons for a battery, a power drill, a robot, a car, a camera, a television, and a laptop.
