

**Smart Goal**- 6th grade will decrease ODR's for disrespectful behavior

(population)

(behavior)

from 5 to 3 between October 22nd and December 22nd, 2021

(# of current ODR's) (reduced # of ODR's)

(start date)

(target date)

as measured by the Big-5 data.

**Replacement Behavior**- Helping students to be more aware of their individual disrespectful behaviors. We want to help them to learn how to better self monitor their behaviors.

<p><b>Prevention (Class Meeting with 6th Grade)</b> <i>During a class meeting with 6th grade we had students brainstorm inappropriate behaviors that had been occurring. We then had students brainstorm what more appropriate behaviors were that should be occurring.</i></p>	<p><b>Teaching (Class Meeting with 6th Grade)</b> <i>After students identified more appropriate behaviors we then went through what classroom expectations were expected of them. We also went through what consequences would occur if expectations were not followed and how students would be recognized for more appropriate behaviors.</i></p>
---	---

<p><b>Recognition (Praise board, ROCK tickets, classroom or individual student badges for recognition).</b>  <i>We will use a praise board for students to recognize each other. Staff recognition through individual student praise and classroom recognition (ROCK tickets, classroom or individual student badges).</i></p>	<p><b>Corrective Consequence (Reteaching class).</b>  <i>Reteaching will consist of students completing a think sheet and reviewing with Dr. B what more appropriate behaviors would be. This will occur at recess or lunch time with students that need this.</i></p>
--	--

Data check dates Mid November (Progress Reports) Goal **Met/** Not Met

*Students have been responding well to the consistency of the 6th grade teachers reminding students of classroom expectations. Many students initially received reteaching and we believe that is helping students to be more self aware of inappropriate behaviors. As of 11-16-21 6th grade major discipline referrals are at 1 which is on track to meet our goal of no more than 3 by the end of December.*

Reasons for goal not being met: (implementation fidelity, misidentification of problem behavior, etc.)
