

## Introduction:

The National Center on PBIS has published a series of School Climate Surveys (SCS) on [PBISAssessments](#). These valid and reliable surveys are intended to ensure that *all* students have a positive experience in school. However, new MO DESE MSIP-6 accreditation requirements around school climate require that Missouri schools and districts survey specific stakeholder groups on the following criteria:

1. Student voice is listened to and respected (secondary students, families, and staff).
2. Climate data is shared with stakeholders (families and staff).
3. There is a team that addresses school climate (staff).

Because many of our partners want to continue to use the validated SCS, but also want to meet MSIP-6 criteria, we have added questions that address MSIP-6 criteria to the Secondary, Personnel, and Family SCS surveys, made these into forced copy Google Forms, and created excel based reporting tools to provide actionable data to our partner schools and districts.

## Instructions:

1. Click on *each* of the links, below, to make one forced copy per survey.
  2. Add the school names as options to the first question (Select your school). This will allow the reporting tool to provide reports disaggregated by each school.
  3. **Important:** other than adding school names, changing *any* question or response on *any* part of the survey will 1) affect the validity of the tool, and 2) break the reporting tool.
    - a. Respondents have the option to choose “I prefer not to respond” to any of the demographic questions.
  4. Click on the “Responses” tab of the editable version of the form, then click on the green “create spreadsheet” icon.
  5. On the Google Sheet, make sure that “Sharing” settings are set to restrict access to only those who you or your district determine need access to the raw data (there is no personally identifiable information collected by the form).
  6. Use the sharing feature on the Google Form to copy the link and send to the target stakeholder group.
  7. MSIP-6 criteria do not affect Elementary aged students (as per communication with MO DESE dated December 13, 2022); as such, elementary schools may use the Elementary survey linked, below, or take the survey on the [PBISAssessments](#) website. Contact your MO SW-PBS regional consultant for more information about taking the survey on [PBISAssessments](#).
